CTU training solutions | Private Tertiary Education

CAPSTONE PROJECT

ETHICAL CLEARANCE CONFIRMATION

Student / Group Template

Project Title	Campus Help Desk Ticketing System
Group Members	Freek Schaefer, Wian Sandenbergh
Module	SPM622 / MDB622
Lecturer / Supervisor	Mr. Dunstan
Week / Stage	Requirements gathering, design and development
Submission Date	29-10-2026

CTU Training Solutions (PTY) Ltd is fully accredited by the MICT SETA (ACC/2006/07/186) through the Quality Council for Trades and Occupations (QCTO). CTU Training Solutions is registered with the Department of Higher Education and Training as a Private College (2018/FE07/004) and provisionally registered as a private higher education institution (No 2014/HE07/004) Co. Reg No:2005/038944/07

Project Title

Enter approved title.

Campus Help Desk Ticketing System: A Database-Driven Application for IT Support Request Management

Data / Participants

Describe whether personal data, interviews, surveys or user testing are involved.

The project will not collect, store, or process any real personal data from staff, students, or IT users. All demonstration data user accounts, ticket descriptions, technician names, and support requests will be synthetic (fictional) data created by the group for testing and demonstration purposes.

Participants: The group may consult one or two IT support staff or help desk administrators informally to understand current support workflows and requirements. These consultations will be conversational and used only to inform requirements; no personal or identifying information will be recorded.

No surveys, no formal interviews requiring transcription, no user testing with real participants, and no access to institutional systems or confidential data are planned.

Ethical Considerations

Explain consent, privacy, confidentiality, secure data handling and minimization.

Consent: Any IT staff consulted will be informed verbally of the project's purpose, that participation is voluntary, and that they may decline or withdraw at any point. No names, job titles, or identifying details will be recorded in the dissertation or demonstration.

Privacy and confidentiality: No personal data about any individual will be collected, stored, or reported. Any workflow information obtained during consultation will be generalized rather than attributed to a specific person or organization.

Data handling and minimization: Only the minimum information needed to define requirements will be gathered. The project database will contain only synthetic records. All project files will be stored in the group's shared repository and password-protected accounts; no real credentials or institutional data will be committed to GitHub.

User testing: Where the group demonstrates the system, only group members and the lecturer/panel will interact with it, using synthetic data. No external users will be tested.

Secure development practices: Login credentials in the system will use password hashing (no plain-text passwords). No real credentials will appear in screenshots or the dissertation.

CTU Training Solutions (PTY) Ltd is fully accredited by the MICT SETA (ACC/2006/07/186) through the Quality Council for Trades and Occupations (QCTO). CTU Training Solutions is registered with the Department of Higher Education and Training as a Private College (2018/FE07/004) and provisionally registered as a private higher education institution (No 2014/HE07/004) Co. Reg No:2005/038944/07

Institutional permission: The project does not require access to institutional systems or confidential records, so no formal institutional permission is needed beyond supervisor approval of the topic.

Confirmation

☑ No human participant data required ☐ Ethical considerations reviewed ☐ Additional approval required

Group declaration: We confirm that no real personal, confidential, or institutional data will be collected, stored, or reported in this project, and that all data used in development, testing, and demonstration will be synthetic.
