DEPARTMENT OF COMPUTER SCIENCE & SOFTWARE ENGINEERING

Software Engineering 2: Research Group Allocation

Research Group Dissertation & Presentation Project Briefing

ACTION REQUIRED: Problem Project Submission
Each group must submit their chosen real-world problem project proposal for faculty approval.

DUE THIS FRIDAY

RANDOMIZED GROUP ALLOCATIONS

GROUP 1 — 5 Members
Michelangelo Carboni
Tshiamo Matsiliso
Themba Mthimkhulu
Timothy Pretorius
Thamsanqa Yawa

GROUP 2 — 5 Members
Jeffrey Buque
Rorisang Hoeane
Ikaneng Khaile
Bryslon Van Rooyen
Tiana-lee Smith

GROUP 3 — 5 Members
Cione Botha
Jarrod De wet
Stefanie Jansen van Vuuren
Hercules Oosthuizen
Sinawe Zwane

GROUP 4 — 4 Members
Crystal Charles
Kgosi Itholeng
Lesiamo Mokone
Raymond Tilstone

GROUP 5 — 4 Members
Nathan Cornelissen
Naledi Mofokeng
Thuso Rampheng
Elmey Stapelberg

GUIDELINES FOR REAL-WORLD PROJECT SELECTION

1. Real-World Relevance

Select an authentic problem affecting a specific domain (e.g., healthcare, logistics, fintech, civic services, or education). Avoid theoretical or purely generic textbook problems.

2. Technical & Scope Feasibility

Ensure the problem requires a software engineering solution that can be architected, evaluated, and documented within the course timeframe. Keep scope realistic yet challenging.

3. Research & Data Availability

Verify that your team can access necessary domain data, user requirements, or stakeholder insights required for the research dissertation and empirical analysis.

4. Innovation & Impact

Focus on problems where existing software solutions are inefficient, outdated, or non-existent. Highlight the potential impact and technical novelty of your proposed approach.

Submission Requirements (Due Friday by 12pm for Approval):

- **Document Format:** 1-page PDF document outlining: (a) Selected Group Lead, (b) Problem Statement & Context, (c) Target Stakeholders, and (d) Proposed High-Level SE Methodology.
- **Submission Portal:** Submit to Miss Lee via Teams by 12pm Friday.
- **Approval Process:** Proposals will be reviewed promptly. Feedback/Approval will be provided prior to starting the full dissertation work.
